REPLY TO ACTION OF AUGUST 27, 2003

Claims 1-27 are pending.

The Applicant thanks the Examiner for taking the time to discuss the case on November 6, 2003. During the discussion, the Applicant clarified an important difference between the claimed invention and the Motoi reference. In the Motoi reference, an expected output signal is compared to an actual output signal (i.e., output v. output), whereas in the present invention, an output signal is compared with an input signal (i.e., output v. input). The Examiner indicated that he would consider this difference which is described in detail below.

The Applicant also thanks the Examiner for indicating that claims 7-15 are allowed and that claims 19-27 include allowable subject matter.

In view of the following remarks, the Applicant respectfully requests withdrawal of each of the rejections and allowance of the application.

REMARKS

In reply to the Office Action of August 27, 2003, Applicant submits the following remarks.
